EXECUTIVE SUMMARY

I am a software engineer (AI) who absolutely loves building things, whether it is software, hardware, or both. Experienced taking products from idea to production, from full-stack AI applications for real clients, having worked at startups, for a Formula One team and more.

EDUCATION

Brandeis University, Waltham, MA

Master of Science in Computer Science

Expected Graduation May 2027

Brandeis University, Waltham, MA

Bachelor of Science in Computer Science

Graduated Cum Laude August 2026

-Completed in three years & Achieved Dean's List recognition for three semesters

RELEVANT EXPERIENCE

YC-Backed Healthcare AI Startup , Remote

August 2026 - Present

Software Engineer Intern

- Building software using AI for AI Healthcare Startup. Working daily with the founders to build the product from the ground up.

AI Software Consulting, Remote

June 2026 - Present

Software Engineer and Consultant

- Built and deployed Emmaily, a RAG email assistant for a non-technical industrial supplier.

- Features cited answers, OAuth mailbox sync, multi-tenant organizations, and encrypted storage. (Python, FastAPI, React, TypeScript, PostgreSQL/pgvector, LiteLLM, Docker)

Securitas Ex Machina Lab, Brandeis University, Waltham, MA

May 2026 - Present

Research Assistant under Professor Kostas Solomos

- Researching browser device fingerprinting through WebGPU, using GPU precision, rendering, timing behavior, and more!

Brandeis Computer Science Department, Waltham, MA

August 2025 - Present

Teaching Assistant

- COSI 142A Embedded Systems Development, Professor Ju Hyoung Mun | Spring 2026, Fall 2026

- COSI 131A Fundamentals of Computer Systems, Professor Liuba Shrira | Fall 2025

Brandeis Engineering and Design & Innovation, Waltham, MA

October 2023 - Present

Classroom Technician and Student Worker

- Began working as a Freshman with the first Engineering class, helping build the Engineering program at Brandeis from the classroom.

- Help guide students, faculty, and staff with design, fabrication, soldering, and in class projects.

- Run and maintain a fleet of 40+ printer 3D print farm

- Built a print job tracking system (Apps Script, Sheets) used for 2+ years. Building v2 with Cloudflare Workers.

Atlassian Williams Racing Formula One Team, Grove, UK

June 2025 - August 2025

Off-Car Engineering Summer Intern

- Worked onsite reporting to the Head of Off-Car Engineering. Designed FIA testing parts, garage pit equipment, STEM activities, and tooling in Siemens NX, and released them to manufacturing.

The Bonnot Company - Manufacturer of Custom Industrial Machinery, Akron, OH

May 2024 - August 2024

Summer Intern

- Supported the engineering team on the factory floor, assembling and testing single screw industrial extruders.

Toys "R" Us, East Rutherford, NJ

June 2023 - August 2023

Summer Employee at American Dream Flagship Store

SAMUEL L. SHMIDMAN

Waltham, MA & New York, NY

SamuelShmidman@gmail.com • 917-756-6955 • [linkedin.com/in/samuel-shmidman](https://www.linkedin.com/in/samuel-shmidman) • portfolio.shmiditech.com

- Excelled in a dynamic retail environment, handling cashier duties, stock management, and warehouse operations.

PERSONAL PROJECTS

- Skoli: Live classroom platform (Django, PostgreSQL) with assignments, quizzes, grading, and a CLI, used for AP CS tutoring.
- Switchboard: Desktop AI client that routes conversations across local and hosted models, with tool calling, MCP plugins, and memory. (Rust, Tauri, SvelteKit)
- Built EZ-TES, a React Native time-tracking app for logging hours to project codes at Williams Racing. Available on the iOS App Store.
- Hardware: Designed custom PCBs in KiCad, including a keyboard macro controller. Currently reviving discontinued smart hardware by gaining low-level access over JTAG to run Android on it.

HOMELAB & INFRASTRUCTURE

- Run a multi-node homelab: Proxmox hosts connected over LAN and a Tailscale VPN, LXC and Docker services, a three-node Raspberry Pi k3s cluster, a Home Assistant server, and local LLM inference with llama.cpp.
- Operate Hetzner cloud VMs serving public-facing deployments via Cloudflare Tunnel. Self-hosting Forgejo with Forgejo Actions CI, and monitor services with Uptime Kuma.

SKILLS & INTEREST

- Languages: Python, JavaScript, Rust, Java, C, SQL, HTML/CSS
- Frameworks and Tools: FastAPI, Django, React, React Native, Node.js, PostgreSQL, MongoDB, Docker, Linux, Kubernetes
- Hardware and CAD: Siemens NX, Fusion 360, SolidWorks, KiCad, 3D printing, Arduino, Raspberry Pi
- Passionate about 3D printing, product design, watches, F1 racing, flying planes
